After using the mystery radioactive element (codenamed “K”) found in an alien craft to create the Super Soldier hunter Ultra-Metaallo, Lex Luthor experimented with his remaining supply to create a massively powerful bomb.

These K-bombs not only ended the war but spread small amounts of K-radiation throughout Earth’s atmosphere. When Super-Soldier returned from his icy paralysis, he found himself strangely weakened by the trace amounts of K-radiation, which affects the alien DNA in his system.
